#Lecture 21: CSS Media Queries and Custom Variabes

Media query is a css technique introduced in CSS3. It uses the @media rule to include a block of css properties only if certain condition is true.

for example:
```
@media only screen and (max-width: 600px) {
        body {
                back-ground-color: red;
        }
}
```
